01 · THE ATTENTION ECONOMY

Attention is the Moat.

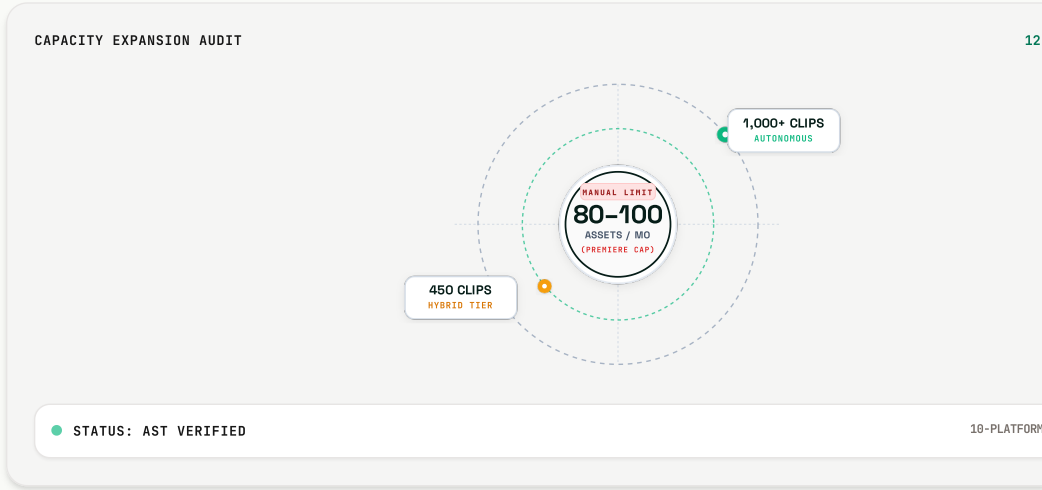

Paid ad CAC is breaking brand economics. Enterprise brands must become autonomous media engines.

Monthly Remotion AST Capacity

> *"Attention is the only durable moat as technology commoditizes."*

02 · THE BOTTLENECK

The Headcount Ceiling.

Linear agencies scale payroll, not output. Manual Premiere keyframing caps capacity at ~80 monthly clips.

Manual Timeline Assembly 50%

Keyframing captions & typography sync (4–8h/clip in Premiere/AE).

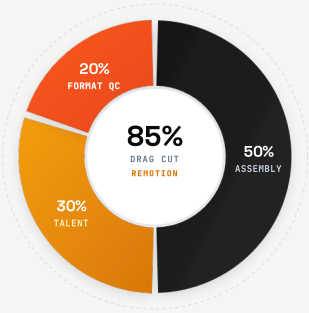

Talent & Reshoot Friction 30%

Scheduling drift & audio retakes across 70+ brand channels.

Format QC & Compression 20%

9:16 vs 16:9 safe-zone re-renders and platform packaging.

THROUGHPUT DRAG AUDIT

DETERMINISTIC COMPOSITION

● 03 · DETERMINISTIC SYSTEM TOPOLOGY

Code Replaces Keyframes.

One founder shoot programmatically compiles into 100+ multi-format assets via deterministic React Remotion AST.

[01] <1.2s ACK

Edge Ingest

Automated webhook intake with HMAC SHA-256 validation.

SHA-256 SIGNED →

[02] MCP TYPED

FastMCP Schema

Typed contracts with strict JSON Schemas and zero brand drift.

ZERO SCHEMA DRIFT →

06 · SHIPPED PROOF-OF-WORK RECEIPTS

Verified Technical Provenance.

Production automation engines, upstream open-source PRs, and deterministic webhook pipelines backed by physical commits.

Aman Suryavanshi

Autonomous Systems Automator

Delhi NCR / Bengaluru · On-Site & Hybrid

Specialized in high-throughput media pipelines, FastMCP protocol gateways, and executive context relay—translating unstructured founder discovery into verified production software.

OPERATING VECTOR

Zero LeetCode trivia. 100% production shipping: AST validation, webhook queues, and programmatic React video.
